

UNDERGRADUATE

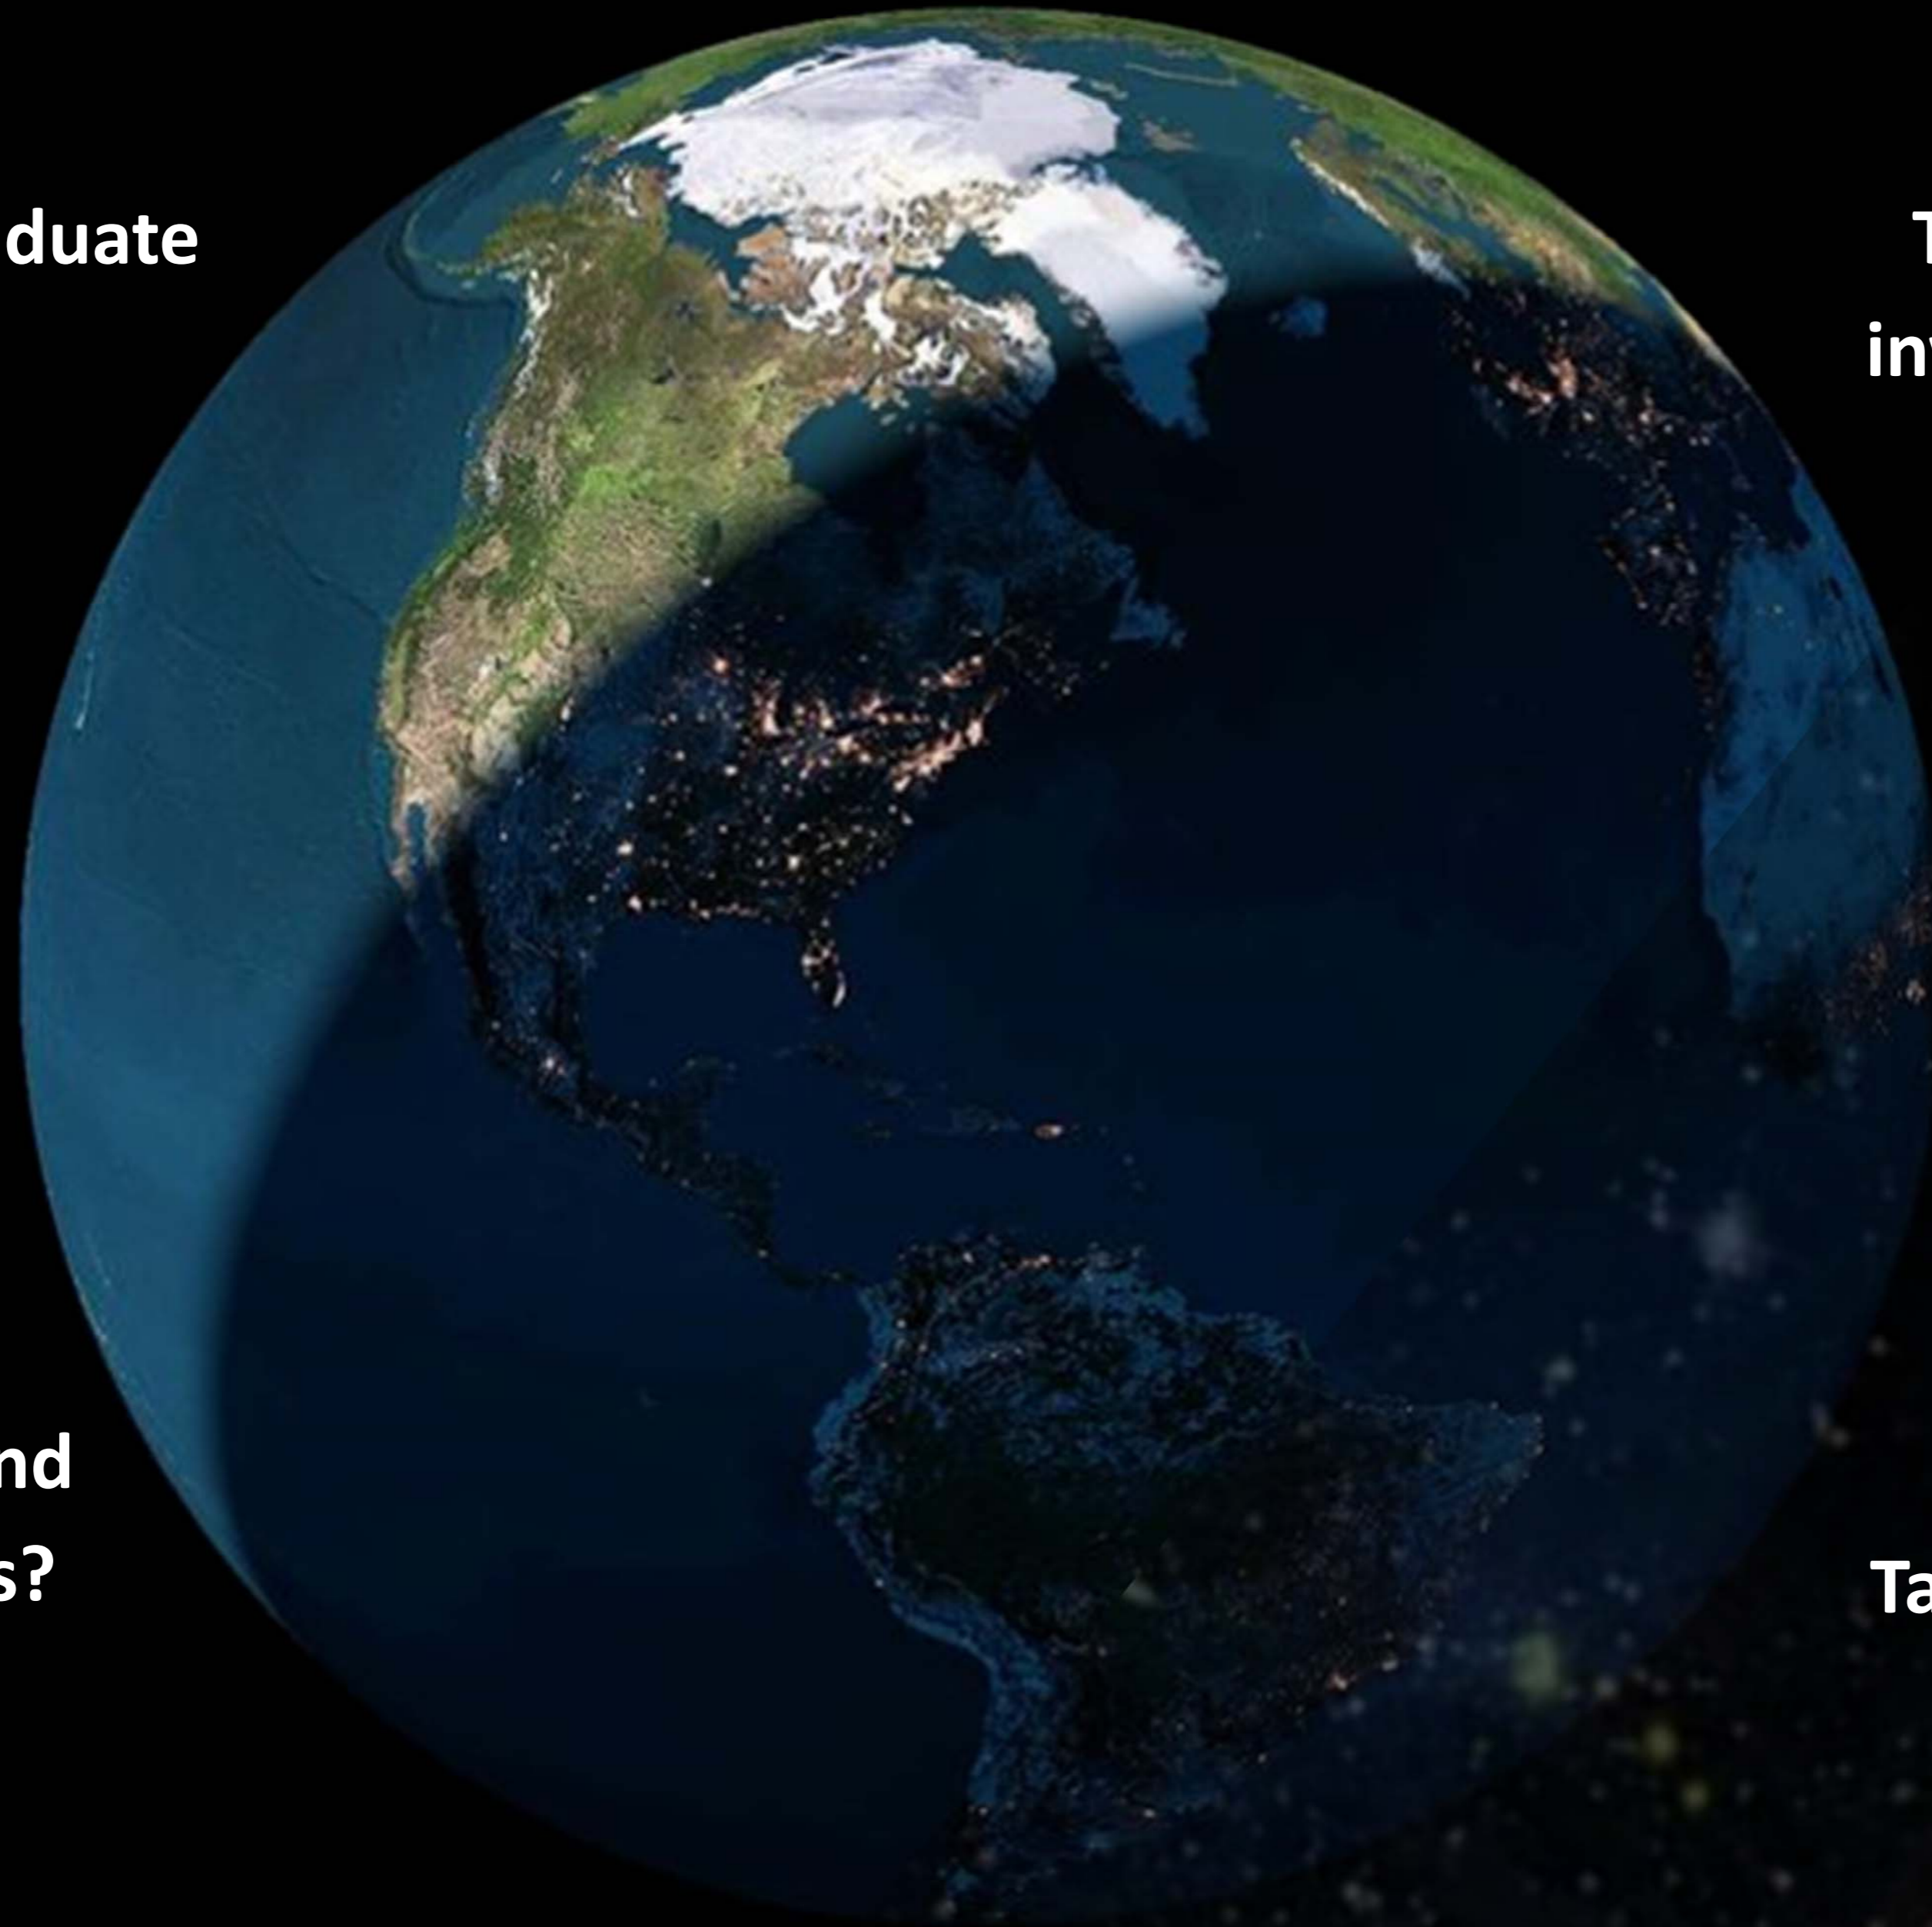

SUMMER

RESEARCH

ABROAD PROGRAM

Are you an undergraduate student passionate about astronomy? Do you want to be part of a large international network of observatories chasing exotic fast events like colliding neutron stars, supernovae and near -Earth asteroids?

The GROWTH project invites applications for our summer research program. Successful applicants will undertake a summer research project at one of our international partner institutions in Japan, Sweden, Taiwan, India, Israel or Germany.

DEADLINE: 22 FEB, 2017
