

Conclusions

The smile of your paper

- Using past tense in the conclusions is fine, except where you want to emphasize your contribution.
 - *In conclusions, our modified model has not yet provided definitive evidence for or against the predicted end of the Universe. However, it **confirms** that a proper selection of the observed sample may bias ...*
- Preempt with assumptions and limitations
 - *We expect that with an enlarged observed sample ...*
- Be consistent with the abstract and introduction. But do not cut and paste.

The AJ publishes original astronomical research, with an emphasis on significant scientific results derived from observations, including descriptions of data capture, surveys, analysis techniques, and astronomical interpretation. [[Read more](#)]
